Maximum Marks	4 Marks

CUSTOMER JOURNEY MAP

Project: Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites

User: Student

This map illustrates a student's journey while exploring and analyzing UNESCO World Heritage Sites data using the interactive dashboard and story.

STAGES	 1. AWARENESS I discover the project	 2. ACCESS I open the portal	 3. EXPLORE DASHBOARD I interact with dashboards	 4. VIEW STORY I read the story	 5. ANALYZE & INSIGHTS I gain insights	 6. EXPORT & SHARE I export or share findings
 ACTIONS	- Hear about the project from teacher/college or GitHub - Get interested in exploring UNESCO data	- Open the Flask portal in the browser - Navigate to the home page	- Select filters (Country, Category, Region, Year, Status) - Explore visualizations (charts, maps, KPIs) - Switch between dashboards	- Open the Tableau Story - Go through each point in sequence - Read explanations and insights	- Analyze trends and patterns - Compare countries, regions, categories - Identify key insights for assignments/projects	- Download dashboard views or data - Take screenshots - Share insights in reports or presentations
 TOUCHPOINTS	- College resources - GitHub repository - Project documentation	- Web browser - Flask web portal - Home page	- Tableau dashboards (embedded) - Filters, buttons, charts, maps	- Tableau Story (embedded) - Navigation arrows	- Dashboard visuals - Tooltips & summaries - KPIs and charts	- Download options - Screenshots - Reports / PPT
 GOALS & MOTIVATIONS	- Find a reliable source to understand UNESCO World Heritage Sites - Get useful data for academic work	- Quickly access the dashboards - Understand what the project offers	- Explore data interactively - Find specific information (e.g., by country or category) - Understand distributions and trends	- Understand the storyline and key takeaways - Learn insights in a structured way	- Derive meaningful insights - Support research, assignments, and presentations	- Save and share findings - Use insights for reports and academic projects
 POSITIVE EXPERIENCES	- Project looks interesting and relevant - Clear purpose and benefits	- Easy to access - Clean and user-friendly interface	- Interactive and visually appealing - Filters work smoothly - Easy navigation	- Story explains data clearly - Visual flow is engaging - Easy to follow	- Data is easy to understand - Helps in quick comparison - Useful for decisions	- Easy export/share options - Insights are ready to use
 PAIN POINTS	- Hard to know if the project is useful - Unclear what data is available	- Slow loading or connection issues - Not sure where to start	- Too many filters can be confusing at first - Need time to understand charts	- Too much information in one view - Some terms may be unclear	- Hard to find specific insights sometimes - Need more context for some data	- Export format may not be suitable - Need more customization options
 OPPORTUNITIES	- Promote the project in college - Provide a short intro video or guide	- Improve loading speed - Add quick start guide on home page	- Add default filters & examples - Provide tooltips and information icons	- Add summaries on each story point - Provide glossary for key terms	- Add advanced filters - Provide downloadable summary insights	- Provide more export formats (PDF, PPT) - Add share via link option

Overall Experience Goal: Help students explore, understand, and gain valuable insights from UNESCO World Heritage Sites data through an interactive and easy-to-use dashboard and story.
